Projects

Kindred Connect - Intergenerational Bonding Platform

[GitHub](#)

- Designed a platform aimed at fostering meaningful connections between orphaned children and elderly individuals.
- Developed responsive user interfaces and structured workflows supporting onboarding and interaction.
- Designed matching concepts based on shared interests and emotional compatibility.

AURA - AI-Powered Digital Wellness Early Warning System

[GitHub](#) . [Demo](#)

- Built an AI-powered screening system to identify problematic digital usage patterns using psychometric and behavioral indicators.
- Developed a Random Forest-based risk prediction pipeline using 5,000+ synthetic records and engineered behavioral features.
- Implemented the PDURI risk scoring framework to generate interpretable risk categories and intervention recommendations.

Machine Learning Supervised Learning Portfolio

[GitHub](#)

- Implemented supervised learning algorithms including Linear Regression, KNN, SVM, Decision Trees, and Random Forests.
- Applied data preprocessing, feature engineering, model training, and evaluation across multiple datasets.
- Documented implementations and learning outcomes to create a beginner-friendly machine learning reference repository.
